High-energy student currently finalizing Graduation in Computer Science and Engineering. Highly organized, responsible and well versed in personal interaction and communication skills.
Computer security enthusiast with 4 years of progressive learning and **Python Programmer** with 6 years of learning and scripting experience. Self-motivated learner in expertise of Web Application Penetration, Python Scripting and Linux System. Well-trained in and exploit script writing. Driven to quick learning, and excited to contribute more in industry with absorbed knowledge.

Skills

- Penetration Testing
- Server Exploit
- Cryptography
- XXS-Reflected,DOM,Stored
- SQL Injection
- Ethical Hacking
- OSWAP-Top 10 Vulnerability
- Python2 & Python3
- Django - Python Web App Framework
- MongoDB - Datbase Utility
- Linux - Hand On Experience
- React Native
- JavaScript
- Android App Development

Work History

- Mar 2019**
- Current
- Technical Head**
Ashray Organisation, Phagwara, Punjab
I manage the web contents of a non profitable NGO. And look after the security of the organization

Education

- Jul 2014 -**
Mar 2015
- High School Diploma**
G.N. National Public School - Gorakhpur
- Jun 2016 -**
Mar 2017
- Intermediate: Science**
G.N. National Public School - Gorakhpur
- Jul 2017 -**
Current
- Bachelor's of Technology: Computer Science And Engineering**
Lovely Professional University - Phagwara
(One Pending Reapper)

Programming Languages

- C
- C++
- Python
- Java
- PHP
- Java Script

Technical Trainings

- Cisco Certified Network Associate (CCNA)
- Linux Administrator
- Cyber Security & Bug Bounty
- Penetration Testing and Ethical Hacking
- Pen Testing (Charls Sturt University)
- Certified Network Security Specialist (CNSS)

Accomplishments

- NCIIPC (Govt. of India)** - Letter Of Appreciation
Bug reported on NCIIPC titled: SPF Record and DMARC Missing leading to email spoofing to inbox.
- Avans University of Applied Sciences-** Letter Of Appriciation
For reporting Critical Data Exposure from thier digital resource.
- Tidepool** -Letter Of Appreciation
Bug Reported For tidepool.org Website titled: User Account Takeover.
- BugCrowd** : Ranked 7827
This real world platform made me realize what security measures are present in industries, how the industry is securing itself on a digital base and how we could still dig vulnerability from them. Having patience, application of knowledge, lots of practice along with the basic steps of Penetration testing are the key to success.
- HackTheBox:** Top-100 Globally , Top-10 In INDIA
On this ground of rich cyber experts, i exploited a total of 24 machines and completed 100+ discrete challenges including WEB,CRYPTO,REVERSE ENGINNERING and others
Owned 21 Users and 13 Root Access machines. Learned about SSH, Linux,Windows,Sql-Injection,File-upload exploitation,URL injection and a hand on practice in multiple tools.

Hall Of Fame

- Dell**
 - XXS Bug reveling User Data**LeanTime.io:**
 - Reported XMLRPC Bug
 - XXS Bug reveling User Data**Tidepool:**
 - Server Missconfiguration and Inapropriate data handling**Underarmour.com:**
 - Github Data Exposure**Inflectra.com:**
 - Cross Site Request Forgery**Transloadit.com**
 - Cross Site Request Forgery**zivver.eu**
 - Account Take Over & Data Exposure**Avans University of Applied Sciences**
 - Critical Data Disclosure & DOM XXS**Humble-Bundle**
 - Server Misconfiguration**HubSpot**
 - ClickJacking in Login/Signup Page

Projects

- Hotel/Resteraunts Search App Using Zomato API**
https://github.com/deepeshkpandey/Zomato_SEARCH_React_nativeApp.git
This android application is build using React-Native and uses Zomato API to fetch data of nearby available Hotels and their foods.
- Know Your Neighbor App**
https://github.com/deepeshkpandey/Know_Your_Neighbour.git
This application is beautifully designed using React Native,JavaScript,MongoDB,FireBase. This app is intended to provide the near by details of your current location sorting according to your preference.
